

The most advanced automated and recurring billing solution on the market

ModernBill is the premier automated billing solution. Having earned an excellent reputation for serving the web hosting industry, ModernBill version 5 now offers the flexibility for multiple billing scenarios.

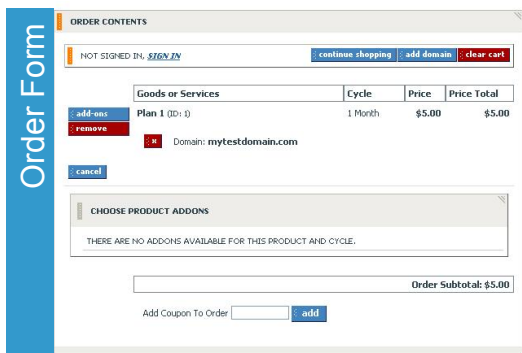

With a growing client base consisting of web hosts, VOIP, ISP, and WISP companies, ModernBill has proven to be a value added solution enabling its end-users to fully automate billing with virtually any type of product or service including, but not limited to, products and services on recurring revenue cycles.

With the level of automation provided by ModernBill, your clients can enjoy the flexibility to setup accounts in real time without the hassle of using a third party tool to organize your data.

What can it do?

- Automated Signups
- Automated Payment Processing
- Automated Account Provisioning
- Online, Recurring, Web Based
- Flexible, Powerful, Extensible

Stop the manual process and get automated with ModernBill

No other billing software comes close to providing all the features, flexibility, and functionality of ModernBill.

Key Benefits:

- Increase productivity through billing and automated payment processing
- Full double entry accounting solution
- Multiple database options
- Multi currency, multi language, multi tax throughout the order form and accounting packages
- Credit card encryption algorithm
- ROI – cost of manually provisioning compared to a fully automated solution

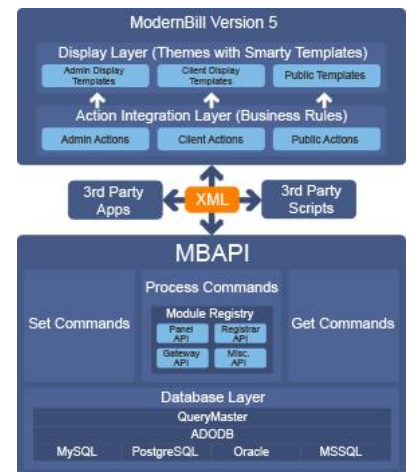

Flexible and expandable

ModernBill also provides the ability to develop your own custom modules.

- Integrate your own:
- gateway
 - control panel.
 - 3rd party application.

The possibilities are endless!

The MBAPI is the core engine of ModernBill. Fully documented, the MBAPI is the latest technological breakthrough in billing software design and is ideal for those wanting to integrate all their systems into one solid application.

Benefits at a glance

Complete billing automation

ModernBill provides the tools necessary for hosting companies to automate the signup, provisioning of accounts and services, invoicing, and billing.

Open API for seamless integration

Using the new MBAPI, ModernBill is capable of an unparalleled level of integration allowing it to work with more control panels, payment gateways, and registrar modules than any other billing solution.

Grows with your business!

Whether you have a new start-up or large established company, ModernBill grows with the success of your business.
